

New AST Panache Heritage Flooring

Panache timber floors have been developed by Australian Solar Timbers as part of a new recycling initiative. This innovative process combines skilled craftsmanship with state of the art engineering technology to reclaim previously discarded boards from within the milling process and convert them into precisely machined, high quality flooring at a surprisingly economical value.

Panache offers an historic heritage style with each of the hand selected boards individually graded to a standard which allows a balanced amount of natural character. The heritage appearance of Panache is further enhanced through the controlled blending of Australian hardwood species into an original collection of distinctive timber colourations which are named Bronze, Pumice, Tropic, Pecan and Russet.

New AST Panache is highly durable, solid wood flooring which has been introduced to add individual diversity to home interiors as well as being ideally suited for commercial spaces such as offices, shops and cafes.

AST precise tongue & groove machining and flawless end matching means ease of laying for the most exacting of applications.

Panache comes in 80 x 19mm and 130 x 19mm solid floor designs in easy to handle 1.2m lengths and is designed for installation over flat sheet subfloor or concrete.
